

## Product Designer (UX/UI)

London

SOMA Analytics is an **investor-backed** and **award-winning start up** that develops pioneering **mobile health technology**. We have built the world's first smartphone-driven Mental Resilience programme, combining aspects from psychology and medicine with machine learning and hardware.

We are a tight-knit, international family that is passionate about building great products. From encouraging unconventional and lean thinking to advocating a healthy lifestyle, we treat our employees as our greatest asset.

We are looking for a talented **Product Designer (UX/UI)** who loves to design beautiful software products. You will be involved in end to product design pushing through the UX process from user interviews and user testing to the design and prototyping of intuitive user interfaces (iOS/Android/web).

### Benefits of Working at Soma Analytics

- Challenging position in a growing early-stage company.
- Flat hierarchies and an opportunity to make a substantial impact quickly.
- Opportunity to learn about and contribute to SOMA's innovative research findings.
- Create and deliver products that make a difference to people's health.
- An office in the epicenter of Europe's startup capital, London.
- Lots of fun team events.
- Competitive salary.

### Requirements

- Educational background in UX, interaction/communication design, or a related technical field.
- 3-5 years' relevant work experience.
- Experience designing intuitive and engaging user experiences across web and mobile.
- Able to conduct user research, usability testing and incorporate feedback into designs.
- Able to create user journeys, UI specifications and design assets for development.
- Confidence to liaise with stakeholders across different business functions including Product, Science and Development.
- Experience using Photoshop, Illustrator and Sketch is required and HTML/CSS is desired.
- Creativity and drive paired with strong analytical skills and attention to detail.
- Passionate about user experience and user interface design.
- Passionate about mobile health and healthy behaviour change.
- High aptitude and quick learner.
- Confidence to lead the design function at Soma Analytics including coaching and mentoring junior designers.
- Ability to apply lean principles to UX/UI.

Interested? Please send us your CV, cover letter and portfolio to Tashya at [careers@soma-analytics.com](mailto:careers@soma-analytics.com). Look forward to hearing from you!
